

 right now Canvas is static thinking in terms of a draw loop in the canvas like

Static Canvas

```
// setup() runs once
void setup() {
  size(640, 360);
// draw() runs continuously
void draw() {
  translate(width/2, height/2);
  point(0, sin(t));
  // increment values to animate
```

Static Canvas

- right now Canvas is static

- thinking in terms of a draw loop in the canvas

```
// setup() runs once
void setup() {
  size(640, 360);
// draw() runs continuously
void draw() {
  translate(width/2, height/2);
  point(0, sin(t));
  // increment values to animate
 t++;
```

Draw Loops

Processing vs Compose
