# Capturing Images

- can take screenshots and crop!

- too tedious; something quicker?

- capturing only the relevant composable?

Capturing

Capture specific composables

-Save Bitmaps from Composables?

-API 28: `PixelCopy!`

-< API 28: wrap View and use
  `View.drawToBitmap()`

```kotlin
val bitmap = Bitmap.createBitmap(
    /* width = */ width,
    /* height = */ height,
    /* config = */ Bitmap.Config.ARGB_8888
)

// API Level 28
PixelCopy.request(
    /* source = */ context.getActivityWindow(),
    /* srcRect = */ Rect(rect),
    /* dest = */ bitmap,
    /* listener = */ { copyResult →
        if (copyResult == PixelCopy.SUCCESS) {
            // use the bitmap
            ...
        } else {
            // Handle failure
        }
    },
    /* listenerThread = */ Handler(getMainLooper())
)
```
